

Missouri Items.

The Missouri Annual Conference of the Methodist Episcopal Church, South, will hold its next session in this place, commencing on Wednesday the 28th of this month, (September.) About sixty Ministers will be in attendance, and the Conference will be in session about a week. Bishop ANDREW will preside.—Palmyra, (Mo.) Whig.

DEATH FROM THE STING OF A YELLOW JACKET.—Mrs. Dumbeck, a lady residing in the upper part of this county, was stung on the wrist, a few days since, by a yellow-jacket, from which death ensued almost instantly. The deceased was somewhat advanced in years, and previous to her death had been in general good health.—[Palmyra (Mo.) Whig.]

Rev. JOHN A. HENNING, delegate of the Sons of Temperance and Maine Liquor Law Association, of this city, left on last Monday for the World's Temperance Convention, to be held in the city of New York, commencing on tomorrow, the 6th inst.—[Boonville Central Missourian, 5th.]

ELK SPRINGS.—The above springs were sold on last Monday, at Bowling Green, at Commissioners' sale, for \$5,000. Mr. A. McPike, who was the purchaser, informs us that it is his intention, during the coming fall and winter, to make such improvements as will render these springs one of the most desirable watering places in the United States.—[N. E. (Pike county, Mo.) Missourian.]

MILLET.—Major KIRBY has shown us a sample of millet, raised on his farm, which is hard to beat. The heads are eleven inches in length, and well filled with seed. It is said to be a fair sample of a large crop growing on his farm.

Millet has proved to be valuable food for stock, and produces two or three times as much as any thing else that can be raised on the same amount of land, for which reason it has become quite popular with our stock raisers.—[Independence (Mo.) Messenger.]

Col. MANFERNY, Commissioner of Indian Affairs, arrived in this city on Thursday last—stopping at the Noland House. Yesterday he left for the Indian country to open negotiations with the different tribes.—[Independence (Mo.) Messenger.]

MULES.—Young mules are much sought after, and command good prices, say from forty to sixty dollars per head for fair and good. Those of the best growth and shape, command better prices. We saw one not long since, which sold for one hundred and twenty-five dollars. It was bought by Mr. John H. Estill, of this vicinity, and will be taken to the State Fair, next month. Good grown mules range from one hundred to one hundred and fifty dollars.—[Glasgow (Mo.) Times.]

TOBACCO.—The Glasgow Times says the recent cool nights, and very slight frosts, have made our tobacco growers a little nervous. The crop is looking well and ripening fast. But little is ready for the knife yet, but with favorable weather for the next ten days, a large proportion of the crop will be cut.

Very light frosts have been noticed elsewhere, both in the northern part of Illinois and Missouri, but we doubt whether any injury has resulted from this change of the weather. For two or three days past it has been much too hot for comfort, without any very great prospect of change.

NORTH MISSOURI RAILROAD.—The St. Charles Chronotype says: So far we may safely say, that in the limits of this county, nothing has yet been done that will have any materially beneficial bearing upon the road or upon the public. It is true that one line has been run through this county, but we apprehend that there are but few that think this route will be found to be as good as some others that can be found. But, we like the spirit with which the Board has acted in the matter; it is but just and right that all sections and all interests should be consulted—and then, all things considered, the cheapest and best route should be chosen.

MANUFACTURE OF RAILROAD IRON IN WISCONSIN.—Some capitalists have organized at Milwaukee a company with a capital of \$500,000, for working iron. They have commenced the erection of iron works and rolling mills at Iron Ridge, in Dodge county, about forty-five miles from Milwaukee, capable of turning out over 15,000 tons of rails annually.

ADVERTISING.

Advertising is one of the great objects for which a business paper exists. It taxes the business of him who advertises out of the narrow limits where it is located, and carries it abroad as far as itself travels. It exhibits the interior of your shop, or store, over counties and States, and daily brings from a distance, customers who are new friends to you, and who would never have heard of you except through your advertisement. It has also equal benefits for the readers of the paper. It shows them where and when to get precisely the things they want. A good advertising business and a wide circulation therefore go together, and it is mutually for the interests of the dealer to advertise, and of the citizen to subscribe, in a paper which will bring them together. It is our object to do that thing; we feel that we are made for our patrons' benefit; and we are determined that all our energies shall be expended in endeavoring to promote it. If the public think with us, then let business men and subscribers, in town and country, try us, and see if we do not bring them together for their best advantage.

pendent in endeavoring to promote it. If the public think with us, then let business men and subscribers, in town and country, try us, and see if we do not bring them together for their best advantage.

FIELD'S SCRAP BOOK — New Edition.

Literary and Miscellaneous Scrap Book.
CONSISTING OF Tales and Anecdotes—Biographical, Historical, Patriotic, Moral, Religious, and Sentimental Pieces, in Prose and Poetry. Compiled by William Fields. Second edition, revised and improved.

The Footpath and Highway; or, WANDERINGS of an American in Great Britain, in 1851 and '52. By Benjamin Morgan. This volume embodies the observations of the author, made during eight months' wanderings, as a correspondent for American Journals; and as he traveled much on foot, differs essentially from those on the same countries, by other writers.

New Themes for the Protestant Clergy;

CREEDS without Charity, Theology without Humanity, and Protestantism without Christianity; with Notes by the Editor on the Literature of Charity, Population, Pauperism, Political Economy, and Protestantism. The great question which the book discusses is, whether the Church of this age is what the primitive Church was, and whether Christians—both pastors and people—are doing their duty. Our author believes not, and, to our mind, he has made out a strong case. He thinks there is abundant room for reform at the present time, and that it is needed almost as much as in the days of Luther.

Barber's Shop.

PETER JOHNSON,

RESPECTFULLY offers his services to the public. He keeps the best quality of razors, and keeps them sharp. He will always pay strict attention to cleanliness and neatness. He cuts and dresses hair in a style that never fails to please his customers. As a knight of the scissors and razor he yields to none in Hannibal. His charges are reasonably low. As he intends to continue fitting up and improving his establishment, as fast as his means will allow, he hopes to have the patronage of the citizens of Hannibal whose well known chief characteristic of energy, leads them to desire to see everything on the progressive march. Recollect it is the shop nearest to Hickman's Stove Store. It is on the west side of Main street, two doors north of Bird street.
(ap-23-d-ly)

Flour! Flour! Flour!

Arrena Mill.

FARMERS AND MERCHANTS coming to Hannibal with the intention of selling wheat and buying flour, would do well to call and see us before selling or purchasing elsewhere. Remember the big stone Mill on Bird, between Main and Third streets. Give us a call.
A. S. ROBARDS & SON.
N. B. Our Flour is sold nowhere else but at the Mill. Every sack and barrel is branded with our name on it.
july19/54 "A. S. ROBARDS & SON."

NEW COOK STOVES!!

Persons wishing to buy stoves, should give us a call, and examine our new patterns of

This stove possesses advantages over common stoves, in thickness of the plate, and improvements in draft.

This stove was patented September, 1852, and wherever they have been used, have given general satisfaction. This stove weighs some forty pounds more to the number than any other stove ever brought to this city. The plates in them are from one-half to three-fourths of an inch in thickness. No. 1 weighs over 200 pounds. We warrant them all against fires. These stoves have a Patent Hot Air Flue, which carries the heat that is generated under the fire-plate down the front part of the stove, between two thick plates to the draft at the bottom of the stove.

THE INTRODUCTION OF FILLEY'S STOVES

Into Northern Missouri, to any extent, has been in the last three years; since which time they have been gradually increasing the manufacture and sale of them; and although, owing to their being light and smooth, and something new, some little difficulty attended the sale and use at first, yet by always making Stoves and Castings of the best quality of Scotch Pig and Missouri Mountain Iron, they have proved to withstand fire better than any other Casting made in the western country. The furnace castings and hollow-ware particularly, have been superseded by it, wherever it has been brought into use, and always given satisfaction. Having lived here a number of years, and being permanently located here, purchasers can rely on our guarantee as to the quality of the article sold by us; and as to the operation of our celebrated Prize-Premium Cook Stove, just read the certificates of those who have used them, and are using them now. And another advantage a purchaser will have in buying a St. Louis stove of us, he would not only be getting a stove made of the best material in the world, but he can at any time get an odd piece or plate without any charge, by letting us know that such is wanted, as all our stoves are warranted, and, in case of imperfection, the article will be promptly made good to the purchaser, which he will not find the case with Cincinnati, Chicago, Pittsburgh, and Eastern made Stoves, as you cannot get any odd Pieces. Even if they were warranted, it would be impossible to get odd plates from such a distance.
July 16, 1853—(d6m) C. W. BRYAN.
